"The Last Warning"

Starring Laura La Plante

A picture that will chill you with its spooky thrills as it warns you with its daring drama. The startling story of what happened to a beautiful stage star when she and her company dared the Unknown and came back to a long empty theatre to revive a performance that previously had proved fatal.

This Week

"Annie Laurie" starring Lillian Gish

Note, Janet McIlvrena in person on Saturday night, May 11th with above picture, singing Scotch songs. The girl with the golden voice.

OBITUARY

One of the oldest and most highly respected residents of this district passed away on Monday, May 6th, after a short illness in the person of John W. Fath at the ripe old age of eighty years and three months. The deceased had been in his usual health until recently and was seriously ill only a few days prior to his death, heart failure being the cause.

Mr. Fath was born in Waterloo County, Ontario, where he resided with his family until 1888, when he moved to North Dakota. Eight years later he moved to Alberta, homesteading a few miles west of Champion, where he has since resided. His wife predeceased him by some nine years but with his daughter, now Mrs. Arnold Becker, he continued on the farm.

He is survived by five sons and two daughters: Andrew, Gregory, Stephen, Louie and Mrs. Arnold Becker, all of Champion; Mrs. Charles Hell of Mt. Carmel, North Dakota, and John A. Fath, of Hanover, Ont., all but the latter being home at the time of his death. In addition there are thirty-two grand children and six great-grand children.

Of a quiet and unassuming disposition the deceased was very widely known and highly respected. His long residence here permitted those with whom he associated to appreciate the sterling worth of his character and his passing will be generally regretted.

The funeral was held from the Roman Catholic Church on Wednesday, May 8th, Rev. Father Greene, in charge of the Champion Mission at present officiating. The attendance was very large, the church being crowded to the doors, while many remained outside. Many beautiful wreaths and flowers were in evidence as the last material token of respect on the part of many friends.

High River Presbytery

The High River Presbytery met in Blackie, Rev. R. E. Finlay, Parkland, presided. The convener of home mission committee, Rev. W. J. Kidd, reported that the Carmangay church was not clear of debt, also that there would be summer supplies for the Foot-hills, Tongue Creek and Meadow Bank missions. Rev. Dr. Lewis of Turner Valley was unable to be present because of the roads.

Rev. R. W. Dalglish presented the reports of the hymnal committee and the ritual committee. The members thought that there should be approximately 800 hymns, rather than the limit of 650, and that the tastes and needs of smaller congregations should be considered more. Fifty tunes and fifty hymns from the books now in use were named as worthy of a place in the new hymnal.

Rev. J. N. Brunton presented the plan of Vulcan to build a new house. Two students, G. A. McDougall of Granum, and Henry De Leeuw of Parkland, were recommended to college for another year. Rev. W. M. Chalmers was recommended to the pensions board through ill-health.

The following were appointed as lay delegates to conference: C. B. Marshall, Nanton; C. E. Spencer, Parkland; C. E. Mack and A. W. Kelly, High River; James Elliott, Blackie; Mrs. W. C. Hoskins, Champion; Mrs. L. C. McKimney, Claresholm; F. Barker, Okotoks; C. W. Polk, Carmangay; A. McGregor, Granum; J. W. Clarkson, Vulcan, and Samuel Coulter, Turner Valley.

The alternates are W. E. Shultz, Brant; N. Young, High River; Harvey Chisholm, Abersdyde; J. A. Carlson, Champion; J. May, Nanton, and A. Lewis, Claresholm.

The sum of \$9,500 was allocated for the missionary and maintenance work.

She's just around the corner! Janet McIlvrena, the girl with the golden voice, singing Scotch songs you love to hear, coming with the "Annie Laurie" picture this Saturday night, May 11th.

BAKER-EASTMAN

A. Baker, of the Imperial Oil Co., arrived home from an extended visit to Ohio the first of the week. The announcement of his marriage to Miss Caroline Eastman of Continental, Ohio, on April 10th, will explain the very happy and smiling countenance he brought with him. Mrs. Baker will arrive in Champion with Mr. Baker's eight year old daughter at the end of the school term. A host of friends here will join in the congratulations.

Card of Thanks

The family of the late J. W. Fath wish to express their appreciation of kindnesses received during their father's illness and also for the beautiful floral tributes received.

Ladies' Aid to Hold Birthday Party

The 22nd anniversary of the Ladies' Aid is being observed on Friday, May 17th, by a birthday social to take place in banquet room of the Community Hall. The committee are planning a splendid evening entertainment and are aiming to make this a very pleasant occasion. A few of the bags promised are still out. Kindly send these to the convener of this committee at once. Don't forget the date—Friday, May 17th. The number of years you are old pays your admittance.

"Father says farmers have had a bad harvest this year," writes a boy. "He says most of the farmers will be ruined same as last year and the year before. Father says when ruin stares a farmer in the face, he starts back at it an buys a motorcar."

Mr. Art Turner of Leishman's Clothes, Toronto, will be at Joplings next Monday, May 13th with the summer and fall ranges of models and samples. Let this expert measure you for your new suit or topcoat now. He fits the water to fit.

The failure of the hard supply curtailed the progress of drilling operations at the big well during the past week and up to Saturday night the depth had only been increased to 165 feet. Three wells have since been connected up with the storage tank and it is not anticipated that any further delay from this source, will be experienced. Drilling was resumed at 1.00 a.m. on Monday morning.

A number of new Dominion Government public buildings will be erected shortly at various points in Alberta. According to the estimates totaling \$596,700 recently passed by the House of Commons at Ottawa, provision is made in these estimates for the following construction: public building at Calgary \$300,000; building for immigration and customs purposes at Carmangay \$2,500; building at Camrose \$35,000; immigration and customs building at Coult's \$2,500; grain inspection building at Edmonton \$5,000; immigration building at Edmonton \$35,000; addition to public building at Edmonton \$100,000; armory accommodation at Redcliff \$1,200; additions and alterations to Red Deer public building \$2,600; public buildings at Vegreville \$35,000; public building at Winsworth \$25,000; improved equipment, Calgary post office \$3,500; and improvements and repairs to various other buildings in the province \$17,000.

NOTES AND COMMENT.

The organ of the United Farmers of Alberta expresses the opinion that action taken in Ontario against communistic utterance by individuals is humiliating to tolerant Canadians. There is ground for belief that the Ontario Federation of Agriculture, which has elected the editor of the U. F. A. refers to is a very small minority of the farmers or other residents of Alberta. In this vicinity it was found necessary to curtail the "free expression of opinion" of labor agitators of the communistic type on more than one occasion by having the talkers removed from the district while harvesting operations were under way as they were fomenting trouble among the men with wages at \$7 a day. The following winter these "labor lawyers" decimated the Calgary broad leaf. If there is a farmer in this district who has never been heard from in public, and even the U. F. A. would not describe them as intolerant Canadians.

NEWS NOTES

Opening of a factory at Red Deer has been decided on by the Eddy Match Company, according to definite word received by Mayor Snell of that City. It is planned to secure some forty acres fronting on the Red Deer river as a site for the plant in which approximately 100 people will be employed in manufacturing the company's products for distribution throughout the prairie provinces.

The Alberta coal publicity office in Toronto will be continued during the coming season as part of the program to popularize the Alberta fuel on the Eastern market. A grant of \$5,000 to assist in this work was authorized at the last session of the Legislature and the majority of this sum will be used in carrying out an extensive program of advertising through the eastern provinces.

An intensive soil survey of Lethbridge Northern Irrigation district will be undertaken within the next few weeks. A classification of the lands in the district will also be made with a view to ascertaining the productive capacity of each quarter section in the district. The work will be carried on under the direction of Stephen Ward who has had a number of years experience in this type of survey with the department of soils at the University of Alberta.

Drilling operations to determine the possible location of valuable placer beds along the South Saskatchewan river near Medicine Hat have recently been undertaken. The work is being carried on by Geo. L. Holmes of San Francisco and H. L. Beekman who have had extensive experience in placer mining fields in various parts

of the world. The tests will determine whether the values per cubic yard are sufficiently great to warrant dredging on a large scale.

The existing tax on low priced tickets of admission to such places of amusement and entertainment as moving picture houses, chateaus, etc., has been cancelled by a recent order in council of the Alberta Government. Admission prices not exceeding 25c will hereafter be exempt from tax, the only exception being places for public dancing. The order is to be effective on June 1st. No change will be made in the case of tickets for which more than 25 cents is charged.

I have arrived at the conclusion that it does not matter twopence how you spell a word provided everybody knows what it is, says the Bishop of Manchester, who automatically makes him a member of the Great Scout Club.

To Promote War On Game Pests

Cash prizes ranging from One Dollar to Two Hundred Dollars will be paid by the Department of Agriculture for gopher tails, feet and eggs of crows and magpies, taken in 1929 or before November 1st.

Points will be credited as follows:

- One point for each gopher's tail.
- Two points for each crow's foot.
- Two points for each magpie's foot.
- Two points for each crow's or magpie's egg.

Special trophies taken on or before the 30th day of June and receipts obtained therefor on or prior to that date will entitle the competitor to increased points as follows:

- Feet of crows and magpies, five points each.
- Eggs of crows and magpies, five points each.
- Tails of gophers, three points each.

Competition One—Six cash prizes totalling \$600.00 will be awarded to Game Protective Associations, Gun Clubs, or other organizations in the Province of Alberta obtaining the greatest number of points. Over ten thousand points must be earned to qualify.

Competition Two—One hundred and fifty prizes, ranging from One to Seventy-five Dollars for the residents of Alberta securing the greatest number of points. Points contributed

by any individual in Competition One will be earned to qualify.

Competition Three—The five schools in the Province earning the greatest number of points will be in their order be awarded prizes ranging from Ten to Seventy Dollars. Over twenty-five hundred points must be earned to qualify.

Competition Four—All persons of school age or attending a Separate, Public, or High School may compete. Four hundred and sixty-five cash prizes, ranging from One to Seventy-five Dollars, will be paid in their order, to those obtaining the greatest number of points. Points contributed by any individual in Competition Three will be allowed. Two hundred points must be earned to qualify.

For a copy of the regulations apply to Benj. Lawton, Game Commissioner, Edmonton.

Importance of Thinning Vegetables

(Experimental Farms Note)

Beginners in vegetable gardening are almost sure to make the mistake not only of sowing seed much too thick, but also of leaving the plants too thick in the row. A very large amount of seed is wasted each year because of this and failure to have plants develop properly is another result of more consequence to the sower of the seeds than the waste of seed. Thinning of all vegetables is desirable as soon as the plants are large enough to catch hold of, that is quite small. Lettuce can be used even though the plants are thick, but to have satisfactory individual plants of leaf lettuce the plants should be thinned to five or six inches apart, and the plants of head lettuce should be thinned to eight inches or more apart. They will not develop satisfactory heads if much closer than this. It has been found in the Horticultural Division, Experimental Farm, Ottawa,

Subscribe for "The Chronicle"

th at at larger varieties of head lettuce give the most satisfactory results when the heads are nearly one foot apart. Carrots should be thinned to about an inch and one half apart, beets to two inches apart, parsnips to two inches apart, onions to one inch apart, spinach four to six inches apart. Radish if sown rather thinly are thinned as ready for use. Often too many kernels of corn are left in a hill. Five plants are quite sufficient to leave after the cutworms and birds have taken their toll. Bean plants should be from two to four inches apart, and peas about one inch apart.

Vegetables will not develop satisfactorily if the plants are thick, hence judicious thinning is very important.

EVERYTHING IN HARDWARE

World-Famous, Three-Fuel Hart-Parr 18-36

In official tests, conducted by nationally known engineers, who used cheap distillate for fuel, the great Hart-Parr 18-36 registered a drawbar pull of 5,535 pounds at two miles an hour, and 4,975 pounds at three miles an hour. On the belt it easily pulled the amazing load of 43 horsepower. The Hart-Parr is a three-fuel tractor, burning gasoline, kerosene or distillate equally well. It is the one tractor that develops its power from the cheapest, low-grade fuels. Hart-Pars are made for small, medium or large farms and have three forward speeds to speed up hauling and field work. Drive on yourself and experience the thrill of controlling tremendous power.

Seeds for cultivating dollars

As you turn the pages of this newspaper, dozens of seeds are scattered over your mind. . . . That's a good-looking car. . . . I'd like to have that radio. . . . What a pretty dress. . . . I think I'll try this breakfast food. Some of these advertisements may not interest you. Others will fall on fertile ground, take root and bear fruit in some future purchase.

Advertisements help you to weed out waste, both in your time and your money. They draw a straight line between your cash and the correct counter. They remind you that there are still one hundred cents in a dollar. And they make it possible for you to budget your expenditures before you buy.

Not only that, advertisements stimulate your interest in appliances that save labor, time and money. They help you to keep in touch with the times. Through their products, they offer you an added enjoyment of life.

Cultivate the habit of reading advertisements—they bring you a harvest of much USABLE information

Radical Changes In Truck Licenses

Extensive changes have been made in the licenses required for trucks, a summary of which follows:

The fee to be paid for the license shall be computed as follows:

One fifth of a cent a ton mile of travel during the period of the subsistence of the license over or along any class A highway and one sixth of a cent a ton mile during the same period on a class B highway. The fee shall be paid in monthly instalments.

The ton mile of travel shall be calculated by multiplying the maximum weight of the vehicle, that is the body, plus the chassis, plus the rated capacity, by the number of miles travelled during the month. Every license shall expire on the last day of December next following the date of issue.

Several other classes are contained in the regulations.

Vehicles in classes A and B in carrying insurance against injury to persons, that in public liability, carry

\$2,500 for any recovery for personal injury by one person and \$5,000 for personal injury by all persons in any one accident.

The same two classes in insurance against loss of or damage to property that is property damage insurance, carry \$1,000 for recovery for property damaged in the operation of said vehicle.

Class A cargo insurance is \$1,000 a ton rated capacity of the vehicle. The regulations are effective as from May 1.

Sardines are small fish but they mean big money; in the total, in Canada's Atlantic Coast fishery production, and through the season in New Brunswick they keep busy the largest sardine cannery in the British Empire. This cannery is at Black's Harbor on the Charlotte county coast of New Brunswick, the province where by for the greater part of the Canadian sardine fishery is carried on. A small catch of sardines is also taken in Quebec and some of the fish are also caught in Nova Scotia waters. The market value of the Canadian

production is over a million dollars a year. Statistics compiled by the Fisheries Branch of the Department of Marine and Fisheries show that the total catch of sardines in 1928 was 53,708,200 pounds—a big increase over 1927 when 32,508,000 pounds were landed. The 1928 catch had a landed value to the fishermen of \$390,325 compared with \$302,050 in the previous year.

Radio—An Agency For Peace

The sittings now being held by the Royal Commission on Radio appointed by the Dominion Government to study the whole question of broadcasting, and make report to the Government as to best policy for Canada to adopt in the national interests of the whole Dominion, is having the effect of directing attention from the purely local and entertainment features of this latest radio craze to the possibilities of causing people to appreciate more fully the tremendous possibilities of aerial communication, both in a national and international sense.

While undoubtedly there is a feeling of regret in Canada, that, because of natural causes, it is much easier for people in Western Canada to "listen in" on stations in the Central Western States than it is to "get" stations in Eastern Canada, and for Eastern Canadian listeners to receive the programmes broadcast from New York, Philadelphia and other Eastern United States cities than it is for them to "tune in" on Western Canadian stations—a condition for which it is hoped the present Radio Commission can find some solution, the fact remains that a closer community of interest between Canada and the United States, and consequently a still better understanding, is being developed by means of the radio. And community of interest and understanding is the greatest of all bulwarks to Peace.

But to many in this country it will come as a welcome surprise to learn of the great strides made by radio in Europe and the effect it is having in promoting greater understanding among the diverse nationalities and languages of that war-torn continent. It is almost incredible that within less than eleven years of the signing of the Armistice ending the Great War, the radio should be used in Germany and England to teach the people, not merely school children but adults, the French language; that international "book-ups" of Germany, Poland, Austria, Hungary, France, and other countries are being regularly carried out, so that people in Paris and Warsaw can listen to German concerts in Berlin and Hamburg, and the German people can enjoy the opera in Paris, or a great symphony orchestra in Vienna or Budapest.

There are some good people in Canada who still retain the old fashioned idea that it is unparliamentary and liable to undue interference in this country, if children are taught in our schools to speak and read French, German, or any language but English. In entertaining such ideas Canadians are far behind the times; they are not nearly so far advanced as they are in England and other countries where the learning of foreign languages is compulsory. If every Canadian child, whether of British or French descent, was obliged to learn both English and French, Canada would in a generation become more powerful, influential and prosperous. It would open up to our people the rich literature of both races; it would give us greater prestige among all nations; it would help to promote our export trade in the markets of the world. In this Canada, by reason of its two great races, has an opportunity no other nation enjoys; it would give us greater prestige among all nations; it would help to promote our export trade in the markets of the world. In this Canada, by reason of its two great races, has an opportunity no other nation enjoys; it would give us greater prestige among all nations; it would help to promote our export trade in the markets of the world.

It is predicted that within three years, five years at the most, Canadians will, through the development of national broadcasting at home, and the use of the beam system of wireless across the ocean, be able to sit in their homes and "listen in" on the finest programmes in the world broadcast from London, Paris, Berlin, Vienna, and other European centres of culture, art and music.

We can now speak with Europe by telephone from the heart of Canada's prairies, and the day is fast approaching, so those in a position to know authoritatively state, when by radio we will be in more or less constant communication with Europe, receiving the best they have to offer in public addresses, vocal and instrumental music, and the important news of the day. In turn, Canada will be brought equally close to them. And, in an probability, "seeing" Europe and Europe's happenings through the instrumentality of the radio will more or less rapidly follow "hearing," just as, in reverse order, the "talking" picture has followed the silent movie.

And these things, which are the basis of world peace, as we know people and understand them our prejudices and suspicions are removed. We learn they are human just like ourselves; that they have high ideals and are inspired by lofty motives; that they love the things we love, and hate the unclean and ugly, the vicious, just hate them. As we come to understand their problems, difficulties and aspirations, and they come to understand ours, mutual sympathy will develop, followed by a desire for co-operation, rather than antagonism.

It is only so, through mutual understanding, that permanent world peace can be maintained and the maximum of true progress be made.

Protecting Canada's Fisheries

Means Taken To Guard Against Depletion Of Finny Tribe

River and lake fisheries certainly to save sea fisheries probably, if left to themselves, conform to the economic law of diminishing returns. The Canadian Government, accordingly, has had for a main object the prevention of depletion, the enforcement of close seasons, the forbidding of obstructions and pollution, and the regulation of nets, gear and fishing operations generally. In addition, an extensive system of fish culture has been organized, the Dominion operating 25 main hatcheries, 6 subsidiary hatcheries, and 4 salmon retaining ponds in 1927.

Cuticura Heals Face Itchy Pimples

"I had pimples all over my face. They were hard, sore and red and some of them were large and quite small. Some of them festered and bled, and some of them burst causing me to scratch. Scratching caused eruptions and the itching prevented me from sleeping. They disfigured my face for months, and I tried different remedies without any result. I began using Cuticura Soap and Ointment and it was only a few weeks before my face was completely healed, after using two cakes of Cuticura Soap and tin box of Cuticura Ointment." (Signed) Miss Harriet Hamilton, Box 772, Yorkmouth, N. S.

Make Cuticura Soap and Ointment your every-day toilet preparations and have a clear, even skin, with smooth hands and a healthy scalp with good hair.

Box 25, Montreal 26 and 27, St. Vincent St., Montreal, Quebec, Canada. Sole Importers: J. & W. G. Campbell, Ltd., 100, St. James St., Montreal, Quebec, Canada. Cuticura Cleaning Clinic, 25c.

Measuring Lightning Flash

No Part Of It Ever Lasts For Appreciable Time

A lightning flash lasts about one-seventh of a second to one-tenth of a second, and no part of it lasts more than approximately one-thirtieth of a second, a second. This is the first time in history that the speed of a lightning flash has been measured. It has also been proved that lightning starts from the clouds and the ground at nearly the same instant, and approximately one-seventh of a second later the two ends unite in mid-air. These facts were determined by Dr. C. U. Boys, a British physicist, who has been attempting hundreds of photographs of the last twenty-six years, until a stroke of lightning in New York at last gave him this information.

Northern Air Ports

Settlements in Northern Manitoba To Have Air Mail Service

Manitoba's northern settlements of Oxford, Goddard, and Island Lakes will be added to the growing chain of northern air mail points of call, Hon. P. J. Veniot, postmaster-general, announced in the House of Commons.

Mr. Veniot stated that arrangements had been completed for the conveyance of mail to and from these northern points once a week by aeroplanes of the government, for a period at Norway House, at the north end of Lake Winnipeg.

RHEUMATIC PAINS

Cannot Be Rubbed Out—The Trouble Must Be Treated

Through the blood. The pain of rheumatism is something that you cannot rub out. Every sufferer has been advised to rub this or that liniment all over the aching part, but after all the rubbing the pain remains. Thin blood and rheumatism come together, and to the growing chain of northern air mail points of call, Hon. P. J. Veniot, postmaster-general, announced in the House of Commons. Mr. Veniot stated that arrangements had been completed for the conveyance of mail to and from these northern points once a week by aeroplanes of the government, for a period at Norway House, at the north end of Lake Winnipeg.

You can get these pills from your druggist, or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Pedigreed Hatching Eggs

A record shipment of pedigreed White Leghorn hatching eggs was made recently by the British Breeders' Association of British Columbia to a hatchery at Petaluma, California. The shipment consisted of 26,000 eggs valued at \$5,000.

Illness Kept Her From Work

"I took Lydia E. Pinkham's Vegetable Compound long and I feel so much better every day that I had to keep my bed for two months and I suffered so. I feel so much better every day that I had to keep my bed for two months and I suffered so. I feel so much better every day that I had to keep my bed for two months and I suffered so."

My friends told me of the Vegetable Compound. I am now sound and well and have a good appetite, my color is good and I am in good spirits. Lydia E. Pinkham's Vegetable Compound, 123 Alma Street, Montreal, N. B.

Attractions For Tourists

Vast Extent Of Canada Offers Visitors Interesting Holiday

Canada has a million square miles of forest, countless lakes and thousands of miles of rivers and brooks, providing the finest hunting, fishing, canoeing and camping. The vast extent of Canada and the diversity of conditions in different sections make it difficult for the prospective visitor who is not familiar with the country to decide which particular section interests him most. To overcome this the Department of the Interior has published "Vacations in Canada," a 66-page handbook which sets forth the attractions which Canada offers to tourists and sportsmen. This booklet describes the tourist attractions of each region in the Dominion—the climate, the motor roads, the points of historic interest, the fishing, hunting, canoeing and camping, the principal cities and the popular summer and winter resorts. In addition it gives a summary of the Canadian Customs regulations. "Vacations in Canada" is distributed without charge from the Natural Resources Intelligence Service, Department of the Interior, at Ottawa.

Wine Oratorical Contest. Marceline Brunet, 17, of Norwood, Man., representing the French-speaking schools of the province, won the Manitoba oratorical contest the other day. She was opposed by ten entrants from English-speaking schools in the final match. Miss Brunet will represent Manitoba in the Canadian oratorical contest, which is scheduled to start at St. Adolphe, Man.

ASPIRIN. Aspirin is a trademark registered in Canada.

New Death Dealing Ray

Electrical Driver Recently Invented Develops Three Million Volts

Dr. H. Nelson-Smith, engineer on the staff of the Pacific Gas and Electric Company in San Francisco, said a "death ray" device had been invented by J. J. Martin, electrical engineer of San Francisco. The new device, he said, was capable of developing three million volts. The Martin machine, Nelson-Smith stated, is housed "somewhere in San Francisco," but its exact whereabouts is being kept secret. The invention has been working in co-operation with the electric company, which they will reach the peak of the ray would be instantly snuffed out, the chemical composition of his blood would be changed and the life cells disintegrated," he said.

Praises This Asthma Remedy. A. Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this powerful remedy at the first warning of trouble. Its use is simple, its cost slight, and it can be purchased almost anywhere.

Discover Hungarian Tribes

Historian Finds Ancient Settlement In Heart Of India

Professor Stephen Gajdar, archaeologist and historian, has returned from a 12-months expedition trip to India and announced that he had discovered two Hungarian tribes in the heart of that country. He said they were named Mar and Marva. He also said that he had found the ruins of an ancient palace, together with manuscripts, statues and ceramics which proved that the palace belonged to Hungs.

These tribes, the professor said, were descendants of Magyar nomads who left their homeland to conquer Europe with the army of Attila 1,100 years ago.

B.C. Salmon Pack

The position as regards the salmon pack of British Columbia is improving under present conservation methods. The 1928 pack is now reported at 2,037 cases, which is only 29,061 cases lower than the record pack of 1928. The pack of pinks totaled 792,326 cases, or 19,309 cases more than the 1929 record.

Miller's Worm Powders can do no harm to the most delicate child. Any child, or infant in the state of adolescence, is infested with worms can take this preparation without a quiver of the stomach, and will find it a sure relief and a full protection from these destructive pests, together with manure, and other parasites and great suffering to legions of little ones.

The Teacher—You have failed again. Bobbie—No'm. You only aint zed I know the capital of Minnesota. I said I didn't which, was true.

Worms cause fretfulness and rob the infant of sleep, the great cause of ill health. Mother Graves' Worm Expeller will clear the stomach and intestines and restore healthfulness.

From July 14 to 27, 1911, 68,115 inches of rain fell at Baguio in the Philippine Islands. More than 45 inches fell on one day.

Neuritis succumbs to Minard's Liniment.

Sore Corns Drop Off If You Use "Putnam's"

When you notice any sign of callos on the feet or toes—think of PUTNAM'S CORN EXTRACTOR. Use it, and you prevent corns. No matter if the corn is hard or soft, if it is on the top or between toes, PUTNAM'S will remove it without pain. Insist on PUTNAM'S CORN EXTRACTOR. It does the work—and roots out the corn, quickly and without pain.

Health and Motor Accidents

Men with high blood pressure should use extraordinary care in driving automobiles, according to recent experiments conducted by psychologists of the present type. These experiments showed a definite relation between nervousness and motor accidents. Men with high blood pressure were found to have more than twice as many accidents as those with normal pressure.

No surgical operation is necessary in removing corns if Holloway's Corn Remover be used.

Many automobiles can be driven abreast at low tide on the beach of Jacksonville, Fla. The sand is as firm as on a paved street.

Minard's Liniment relieves pain.

Einstein should make a good train car or bellhop, as nobody can understand what he is talking about.

Clean Up, Paint Up, Keep It Up --- Increases the Value of Your Property

WORLD HAPPENINGS BRIEFLY TOLD

The government proposes to create a national park in Manitoba, it will be in the Riding Mountains and will embrace 1,000,000 acres.

After half a century as sergeant-at-arms in the Manitoba legislature, John McDougall, 88, died April 30, at his home at Lockport, Mass.

The King ordered conferred on General Bramwell Booth, deposed commander-in-chief of the Salvation Army, the Order of Companion of Honor.

Where the Ashburton-Webster treaty was signed eighty years ago, a plaque was unveiled recently by Kiwanis International as a memorial to the friendship between Canada and the United States.

Iyemasa Tokugawa, former councillor of the Japanese embassy at London, and grandson of the last of the Tokugawa shoguns, were appointed to the newly created post of minister of the Japanese Empire in Canada.

A shipment of \$8,000,000 of gold from Germany arrived recently at New York on the liner "Hamburg." Since March, when the present shipment of gold started, \$30,923,000 of the metal has been sent from Berlin to New York.

Professor J. B. Sackville, of the University of Alberta, Edmonton, is the newly chosen president of the Canadian Society of Technical Agriculture. The officers for 1922-23 take over their duties at the annual convention to be held in Winnipeg in June.

Requests On The Farm.—Every farmer and stock-raiser who needs a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for his in the family, but because it is a horse and cattle medicine of great potency, will find it for sweet oil for horses and cattle affected by colds and influenza, anything that can be administered.

Manitoba Highway.—A start on the construction of Manitoba's section of the Trans-Canada Highway eastward to the Ontario boundary, will be made this year, it was announced in the Legislature, when supplementary estimates were before the House for approval. An item of \$200,000 for a start on the highway was passed. The cost when completed will be approximately \$200,000, it was stated.

What you do

There is hardly a household that hasn't heard of Castoria! At least five million houses are never without it. If there are children in your family, there's almost daily use for it. Castoria has been used for nearly a century. And any night you find you very thankful there's a bottle in the house. Just a few drops, and the colic or constipation is relieved; or diarrhoea checked. For a baby's diet, a baby remedy made for young folks. Castoria is almost a household name. You have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby. However harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless anxious night. It is always ready, always safe to use, in emergencies, or for everyday ailments. Any hour of the day or night that baby becomes fretful, or fussy, or restless, was never more popular with mothers than it is today. Every drug store has it.

When your children Cry for It

Paint Pointers

In finishing work it is important that the groundwork be sandpapered and thoroughly dusted off before the next coat is applied. Dusting is indispensable to good workmanship, particularly in the case of woodwork, furniture and automobiles, where a high gloss is the aim of the finisher, and this holds good whether the work is to be finished in varnish, enamel, color varnish, or even in a high gloss oil paint. Without the dust, even when other conditions are perfect, work will present a blotchy, dirty looking, and seedy appearance, and the higher the gloss in the finishing product, the more this condition will be reflected. "Dusting off" does not mean that the dust is to be scattered from any given surface with a rag or anything that comes handy. It simply means that a soft bristle, painter's duster is to be used, and that the dust is not only to be removed from the surface under treatment, but also from every inch in close proximity to the scene of operation.

In the application of paint to wood, the first thing to be done is to get the surface absolutely free from rust, more scratch with a knife will seldom be sufficient; a good scrubbing with a wire scratch brush, or fine sandpaper, is necessary. Nothing does not depend altogether on the quality of the varnish itself. The conditions necessary to ensure satisfactory work are numerous, but the most important are, cleanliness of brushes and surroundings, and a well-ventilated room.

The first coat on new plaster should be very thin in order that the paint may penetrate and harden the surface so as to form a firm base for the following coat. Abundance of time should be allowed between each coat.

Paint, curled up shingles, even when re-stained or painted, represent a depreciation far in excess of the cost of the material. For perfecting, complete the operation by pouring the paint back and forth, so that it can leave no corner or crevice unattended.

It is always best to do such, because it is very seldom happens that glass is perfectly level at the end of the side, hence does not lie flat against the wood. The bedding putty on the ends must be put in freely from under the shingle.

Whenever possible, shingles, for at least three-quarters of their length, should be dipped in a vat of stain, and after they are laid a finishing coat applied with a brush.

Duster brushes should be washed with soap and water before being used on white woodwork, otherwise they are apt to discolor the purity of the ground.

Channels skins for finishing work should never be thrown on the floor nor allowed to come in contact with gritty substances.

Raw linseed oil and turpentine, mixed, is an infinitely better medium than water for keeping brushes soft. A coat of flat paint from callings or walls should never be allowed to dry on the woodwork. They should be wiped off at the end of the morning, and again at the end of the day, with a rag soaked in turpentine. A little labor expended in this way will save a great deal of trouble in the finishing of the woodwork.

The time allowed for drying between coats depends on conditions of temperature, ventilation and surface. This does not mean that a paint manufacturer who declares on his label that forty-eight hours should elapse between coats is necessarily guessing. Not at all! The product has undoubtedly been tested and manufactured to act in this time schedule under fair conditions, but unfortunately, it is likely to be applied under conditions that are decidedly unfair—such as a cold room, no ventilation, greasy or sticky surface—and in such cases the scheduled time of forty-eight hours ceases to possess any value as a reliable guide. As a matter of fact the correct time might be four days—or worse! When the preceding coat is so dry that there is absolutely no suspicion

of "stickiness" under a firm pressure of the fingers or hand, the second coat may be safely applied.

SUNDAY SCHOOL LESSON

MAY 12

THE EARLY MINISTRY OF JEREMIAH

Golden Text: "We must obey God rather than men."—Acts 5:29.
Lesson: Jeremiah 1:1-10; 6:10, 11; 8:18, 9:2; 23:24.

Devotional Reading: Psalm 26:1-7.

Explanations and Comments.
Jeremiah's Call and Consecration. 1:1-10.—Jeremiah was the son of Hilkiah, not the Hilkiah who found the book of the law, our last lesson; a priest in the little town of Anathoth, near Jerusalem. Jeremiah's name ("appointed by God"), and his father's name ("Hilkiah is my portion"), are tokens of the family's loyalty to the God of Israel. At a time when the outburst among the Jews of a very different class of personal names lay on the part of many a lapse from the true faith, and when the Lord's name was being forgotten, it was felt impelled to witness against the prevailing error. It was a natural consequence of a divine call to the prophetic office. It is natural to understand that Jeremiah had long been a student of the law, and had felt impelled to witness against the prevailing error. It was a natural consequence of a divine call to the prophetic office. It is natural to understand that Jeremiah had long been a student of the law, and had felt impelled to witness against the prevailing error.

Jeremiah speaks: "Ah, Lord Jehovah! I am a child," Jeremiah was a child in spirit, and in the consciousness of his own weakness. He distrusted himself at the moment of his call. Once it was a child in spirit, and in the consciousness of his own weakness. He distrusted himself at the moment of his call.

"The time is out of joint," O, superstitious! That ever I was born to set it right.

Jeremiah then all there was no delay in rendering themselves more fit for the tasks.

There is a lesson here for all who live in any degree the tyranny of their own minds. There are no facts against which we chafe and fret, we are not to be troubled by the would-fair refuse, or we place in our surroundings which we think unbecomingly. We are all tempted to try the easy ways of escaping the burden of our own minds. There is a lesson here for all who live in any degree the tyranny of their own minds.

Jeremiah speaks: "Say not, a child; for to whomsoever I shall send you, you shall go, and whatsoever I shall command you, you shall do." Jeremiah was a child in spirit, and in the consciousness of his own weakness. He distrusted himself at the moment of his call.

A Female Pied Piper

Woman in London Declares Hates Charming Creatures

A woman's love for rats has led to a certain quarter of London being so overrun with the pests that official action is to be taken. This female Pied Piper declares that rats are charming creatures and she places food in her garden for them every morning and evening. Neighbors have protested so loudly that efforts are to be made to capture the rats by smothering them out. There is nothing under the existing law to prevent persons feeding any kind of animal or vermin on their own ground.

Tangled Titles

Fletcher: "How did the jury come out in that Army Post case?"
Barker: "They disagreed on the question of title."
Fletcher: "What do you mean?"
Barker: "They said they couldn't hold a Colonel in a Major crime arising from a General's crime, occasioned by a Private quarrel!"

Life is a grindstone, and whether it grinds a man down or grinds him up depends on the kind of stuff he's made of.

Mrs. Josiah Warboys, Ashwell, Herts, has lived 98 years in one house.

Repainting Wooden Buildings

It is always good policy to re-paint a building before the previous coat has fallen into a bad state. If the work is done while the old coat is in good condition and the same value of lightness or darkness, one coat is usually sufficient when a good house paint is employed.

If, however, the old coat has been permitted to fall into a state of decay, it will be necessary, in order to put the surface into good condition, to use two and sometimes even three coats of paint.

The best way to remove paint from old surfaces is to burn it off with a blow torch. This method consists in softening the paint with intense heat, generated by the torch, and then scraping it off with a metal scraper. It is advisable to employ an experienced man for this work.

After the old coat has been entirely removed and the surface of the wood sand-papered and dusted off in the usual way, the building should be painted in the same manner as directed for new wooden buildings.

The second coat of paint should be applied as it comes from the can. Both these coats should be applied with the same care as is given to a new job and the general directions for painting new wooden buildings should be read and followed.

Staining Shingle Roofs.
Use a good shingle stain. Before beginning the work, see that the shingles are dry and clean.

As a matter of economy it is better to dip shingles in bulk before staining them. Dip them in and out as quickly as possible and wipe them off by rubbing across a stick covered with burlap. Then allow them to drain off in a drip trough. They should be stained for only about two-thirds of their length. Stain the exposed ends only.

Point is best for old, weathered shingles, blackened by age and exposure. The priming coat should be prepared as directed for house painting and should be applied with careful attention to the rounded ends of the shingles. The second and finishing coat should be applied as it comes from the can.

A Reasonable Question

An eager looking urban approach to a man hurrying toward his railway station. "Carry your bag," he asked. "No," snapped the man. "I carry it in the way of a three-piece," said the boy. "I tell you I don't want it carried!" snarled the man. "Don't you?" "No, no!" Whereupon the lad broke into a quick trot to keep up with his victim's hasty strides, as he asked, in innocent curiosity, "Then what are you carrying it for?"

Upkeep Of Railway

Half a million cubic yards of ballast, 150 miles of fencing, 55,000 tons of rails, and more than a million crooked sleepers are used annually by the London and North Eastern Railway to maintain their 7,000 miles of line.

London has more than 20,000 holes—English policemen.

Floor Coverings

Next to the walls and ceiling, the floor presents the largest area in the room, and consequently its covering should be well thought out and carefully selected.

The floor, as well as the ceiling, is a plane which holds the four walls of the room together. While the walls form the background for furnishings, the floor is the foundation. A good foundation is always essential to any well-designed decorative plan.

Linoleum floors are attractive, resilient, shock-absorbing, durable, warm in winter and cool in summer. Waxing linoleum gives it a softer, smoother texture and preserves it in its original beauty.

For the average room, a rug with a plain ground and a neat border, or one of the patterned floor coverings, is more desirable than one with a decided pattern.

Large and bold patterns have a decided tendency to make the room look smaller. The patterns are apt to jump and as the ideal floor covering, the patterned rug is usually chosen it must be made to keep its place on the floor. When there is a great deal of furniture, a boldly figured floor covering gives a confused appearance to the room and destroys its restful, harmonious appearance.

Figured floor coverings, however, have their place. In rooms which are sparsely furnished or where the furniture is of a light and simple type, they add to the "furnished" appearance of the room. That is, they take away bareness. In large rooms, they are especially advantageous.

In dining rooms, it is usually preferable to have a figured floor covering, as it does not show soil or stain so quickly as plain floor coverings. In bedrooms, where the furniture is of a light type, a figured floor covering adds to the comfortable appearance of the room. In sleeping porches, enclosed porches or breakfast rooms, where the furniture is not usually plentiful, either the effects of a bold figured floor covering adds greatly to the finished appearance of the room.

It is a wise plan when a lightly figured floor covering is used to use hangings or upholstery material in a plain color or in a neat and unobtrusive all-over pattern. On a rich color, if the hangings or upholstery is figured, plain floor coverings are best. Too many figured patterns in the room create the feeling of motion and the effect produced lacks restfulness. Too many plain surfaces, on the other hand, tend to make the room look bare and uninteresting. Some figured material should be used in every room, but it should be balanced by plain coverings as well as plain material or surfaces without design.

In selecting a figured pattern, the colorings must be considered first. For general use, strong or vivid colors should never be selected. Small all-over patterns are, in most cases, preferable to large sprawling ones. The tone of the floor covering should always be deeper than that of the walls or furniture, as the ground we walk on is always darker than the sky or the landscape. Light-colored floor coverings are exceedingly difficult to fit into a harmonious scheme.

Irish Magistrate: "The defendant says he is a perfectly sound Policeman." He was absolutely intoxicated. If he had been perfectly sober he would have known he was drunk and not made a disturbance.

Laying and Preserving Linoleum

The ideal method of laying linoleum is to cement it over deadening felt paper, which should first be pasted to the floor with any standard grade of linoleum paste. This overcomes bulging and stretching, or opening up of seams and cracks, like hardwood. An occasional water from getting underneath the linoleum and in that way prolongs the life of the flooring.

Linoleum laid in this manner becomes a solid, permanent, elastic floor. It cannot bulge or stretch. The felt paper foundation absorbs all expansion or contraction that may take place in the wood floor and makes the linoleum more durable. It also allows the linoleum to be removed without difficulty or damage should the necessity arise.

The most approved manner of treating linoleum has been found to be waxing. The wax should be carefully rubbed on and the floor polished like hardwood. An occasional treatment of this kind will keep the linoleum in an immaculate condition.

A damp cloth removes all soil from the waxed linoleum and it will be found that scrubbing is entirely unnecessary.

In case there should be extraneous marks of soil on waxed linoleum, they can be removed with a pad of fine steel wool without scratching or damaging the linoleum itself.

Varnishing is best for printed linoleum, as it brightens and preserves the original pattern. It makes the linoleum easier to clean. A coat of good varnish or white shellac will also preserve cork carpet.

Many Varieties Of Bananas
Although most of us know only two varieties of bananas by sight, there are many more. In the Philippines Islands claim fifty-seven. Malay, thirteen, Spain, ten, and Burma, eight.

Australia supplies one-fifth of the world's supply of wool.

TO POSTPONE DISCUSSION OF NAVAL PROBLEM

Geneva.—Complete agreement has been reached by the big European powers to refrain from detailed examination of the naval problem at the present session of the preparatory commission for a disarmament conference, it was learned here in responsible circles.

The question of reduction of the fleets as a supplement to the Washington naval treaty will be adjourned to a date which will be left undecided. Meanwhile, the five powers will continue conversations on the naval problem. The form of these conversations was understood to be not yet determined, but would presumably be exchanges of notes between the five nations.

There may possibly develop into a meeting of experts from Great Britain, the United States, Japan, France and Italy.

The main theme of these conversations will be the American suggestion for agreement on the formula for estimating the equivalent tonnage of cruisers, destroyers and submarines by considering such factors as age, units, displacement and calibre of guns.

It was understood that Japan in particular, the most distant of the five countries from Geneva, wants some time to study the American ideas, which are understood to be received by the powers generally with favor.

Tribute To Wheat Pool

Reference Made To A. J. McPhail In United States Senate

Washington.—Running through much of the discussion of the farm bill in the United States Senate is a tribute to the Canadian Wheat Pool and its workings as explained recently before the Senate committee on Agriculture by A. J. McPhail, of Regina, head of the Pool. It was frequently pointed out in the debate that the stabilization corporation under the pending farm relief bill are expected to function much as the great co-operative pool of Canada.

Senator Norbeck, of South Dakota, prominent member of the Senate, said in a speech that the high tribute in a speech made by Mr. McPhail. Senator Norbeck said Mr. McPhail was sincere and careful in his statements. He emphasized, however, that the Canadian Wheat Pool had not brought Canadian wheat farmers a very large increase in prices.

Senator Norbeck, in summing up, said Mr. McPhail stated frankly that the big result of the wheat pool was the better spirit of co-operation that had been developed among the farmers. He did not count the small additional price they had secured as the most prominent reward.

Canada Had Good Year

League Review Shows Dominion Enjoying Unprecedented Prosperity

Geneva.—"Canada enjoyed a year of unprecedented prosperity," says the Review of Economic Conditions in 1928, issued by the League of Nations, as a basis of the work of the consultative economic committee.

North America, the report continues, it seems probable was the continent where trade developed most rapidly. The United States not only maintained its position of the world's leading commodity country but increased its excess of exports over imports.

Need Coal Agreement

Geneva.—The economic committee of the League of Nations, which has made exhaustive investigation of the coal crisis in the steel industry, reported that international harmonization between producers concerning output and markets must be made if there is to be hope for improvement. A similar conclusion was recently reached by experts on the sugar situation.

Loyalty Of Academics

Ottawa, Ont.—In replying to the editorial leveled against him in the House of Commons last night, Peter Van Zant, in a spirited speech dwelt on the loyalty of the Academics of which he was one, to the British crown. He said so, he said, because his loyalty had been attacked by certain newspapers.

Rioting In Berlin

Communists Suffer Casualties In May Day Battle

Berlin.—Communists in an attempt to "conquer the streets" for May Day, caused an ugly riot in the working class quarter in northern Berlin. They erected barricades, using street repair material, and held off police with rifle and pistol fire. They created confusion by the obstructions and enabled the authorities to clear out the surrounding houses.

At midnight the casualties for the day had mounted to eight dead and 78 seriously wounded. Hundreds of others suffered bruises from missiles or policemen's clubs.

The rioters erected barricades in the main thoroughfare of the Funkstrasse and its side streets. The police charged them repeatedly with batons until the commanding officer realized his force was too weak for these tactics and ordered his men to open fire. Then armors cars were brought up by the police and finally captured the barricade.

Opening Canadian Legation In Tokio

Hon. Herbert Markie Will Take Up Duties As Minister

Ottawa, Ont.—It has been announced from the department of external affairs that Hon. Herbert Markie, before undertaking his duties as Canadian minister to Japan, is making a short visit to England.

In the meantime, arrangements are being made for opening the Canadian legation in Tokyo. Mr. Hugh I. Keenleyside will be appointed first secretary and Charge d'Affaires until Mr. Markie's arrival in Japan, and James A. Langley, Canadian trade commissioner in Japan, will also act as commercial secretary of the legation. The third appointment will be made during the summer.

Mr. Keenleyside was born in Toronto, but came to Japan, where he is now in Vancouver. He is a graduate of the University of British Columbia and of Clark University, Uxbridge, Ontario. He has been appointed by the Japanese government as its representative at Ottawa.

Canadian Press Meeting

Officers Are Elected At Annual Gathering In Toronto

Toronto.—The annual meetings of the board of directors and the members of the Canadian Press, the co-operative news association of the daily newspapers of Canada, extended over three days, were concluded by the election of officers for the year as follows:

President, E. Norman Smith, Ottawa Journal; president, John Scott, managing director of the Toronto Mail and Empire; first vice-president, M. E. Nichols, Winnipeg Tribune; second vice-president, Henri Gagnon, Quebec Le Soleil.

F. R. Livezey, continues as general manager and secretary.

With a view to giving increased representation to the French language newspapers of Quebec and also to the western provinces, the annual meeting enlarged the board of directors from 15 to 21.

Italian Arrested For Killing Chancellor

Assassinate Official When Application For Documents Was Refused

Brussels, Belgium.—While waiting along a street, Alfonso Arseni, chancellor of the Italian legation in Luxembourg, was shot and killed.

His assailant, who was arrested, was an Italian cobbler, named Gino, 29 years of age, a native of Massa Carrara, who recently settled in Luxembourg. He had applied to the legation for certain documents, but his application was refused.

World's Largest Cattle Team

Harlowton, Mont.—The biggest cattle yoke ever made in the Northwest was too small for what is considered the largest cattle team in the world. That was the discovery made by Guy Howes after he completed a nine-foot yoke. Now he's engaged in making a 10-foot yoke which he believes will "out" the team. The cattle together weigh 7,000 pounds.

Pushed For Native's Death

Proctor, South Africa.—For the first time in many years a white farmer was hanged for injuring a native. Jack Ntato, who tied a native to a tree and lashed him so severely that he subsequently died, was sentenced to seven years at hard labor and the farmer's brother was lashed in the Pretoria jail.

CENSURE MOTION IS DEFEATED BY MAJORITY OF 24

Ottawa.—The House of Commons defeated another wave of censure motion involving the cabinet minister-general. This time the amendment, which, like its predecessors, was moved by H. A. Stewart, Conservative member for Leeds, was defeated by 24 votes.

It was a general amendment declaring that "the administration of the post office department by the present postmaster-general has been characterized by inefficiency, disregard of the provisions of the civil service act, the post office act and other statutory authority, and merits the disapproval of this House." Mr. Stewart's former amendment, moved a few days ago, involved censure of the postmaster-general in connection with the attitude of the postmaster at Simcoe, Ont. It was defeated by 27 votes.

In the division today, the Conservatives carried with them in support of the amendment the majority of members of the U.F.A. group in the House, and Liberal-Progressives joined in opposition to the amendment.

Votes recorded in favor of the amendment numbered 68, and against 62.

In moving his amendment Mr. Stewart said facts had been brought out which had started the Canadian public in a state of indignation. The whole background of the matter was the civil service commission, and the attitude of the postmaster. From October 1, 1928, to February 1, 1928, the postmaster-general has dismissed 88 postmasters, and from February, 1928, to April, 1929, eight more dismissals have been made.

In 22 cases appointments by the commission, rejection had been made by Mr. Veniot. In some cases returned soldiers had been rejected in favor of civilians. He had dismissed for petty shorthands men and women of the postal department all over Canada, but the case of an inspector who it was shown had taken funds improperly, Mr. Veniot had not only increased his salary, but had given him an eight per cent. increase in salary.

The postmaster-general had impaired the efficiency of the civil service commission, and his attitude toward it was akin to contempt.

In reply, Mr. Veniot declared Mr. Stewart had omitted to mention what his administration was in efficient, or in what manner he had violated the civil service or any other act.

It was charged, he added, that he had disregarded certificates issued by the civil service commission. This was correct. But he had done so only for valid reasons, and was given authority to do so by the act. He had only one duty, said the postmaster-general, as head of the postal service of Canada.

There had been charges which questioned his loyalty. These were unjust, Mr. Veniot said.

Woke Welcome Naval Reduction

Tokio.—It was learned here that Count N. Sato, Japanese delegate to the preparatory commission on disarmament at Geneva, had been instructed to agree to a proposal whereby a sub-committee would be formed by delegates from the five leading powers to consider proposals of the United States delegate, Hon. Hugh S. Gibson, for broad naval reduction.

London, Eng.—The Lord Mayor's

fund for distressed mariners, was closed after it had reached \$423,000. To this amount the government pound-for-pound grant must be added. The total amount for relief will therefore be \$846,000.

Postpones Long Flight

Berlin.—Captain Hermann Koch, noted German trans-Atlantic flier, told the Associated Press that his projected flight to the United States with Col. James Fitzmaurice, could not be expected this year and possibly not for another two years.

Tynside Trainees

Immigrants from Great Britain arriving on board the Canadian Pacific liner "Duchess of Richmond" at Saint John on that vessel's first voyage to Canada. The men, who hail from Tynside, have all been trained in Canadian farming methods under the British Ministry of Labor, in co-operation with the Canadian Pacific Railway. They are destined for all parts of Canada.

WESTERN PILOT

Battle With Bandits

Detrol Policeman Shoots Assaults In Attempted Hold-Up In Ontario

London, Ont.—Shot in the stomach, Robert Schacht, alleged bandit, aged 20, Windsor taxi driver, and formerly of Yorkton, Sask, died on the highway, following an attempted hold-up of D. McEllan, a Detroit policeman and his wife, who were motoring on a holiday, Leo Derosh, 39, Ford City, Ont., was shot in the hip and lies in a London hospital under guard. A third bandit got away in the darkness.

On a crime cruise in a stolen car, Schacht and his companions crowded McEllan's car into the ditch, Schacht ordered the Detroit policeman to hand over his money. He picked the wrong man. McEllan fired and Schacht ripped out a .22 revolver and fired twice from the hip. Schacht dropped to the road mortally wounded, along with Derosh. The third bandit picked up Schacht and half carrying him, vanished into the darkness.

Plan Second Air Derby

Winnipeg and St. Paul Will Stage Event This Month

St. Paul, Minn.—The second international air derby from St. Paul to Winnipeg was set for May 24 and 25. More than 25 planes are expected to enter this race, according to the plan of the St. Paul and Winnipeg Flying Club on a good will exhibition to be held in Winnipeg on the same dates.

The derby will leave St. Paul, May 24, and will arrive in Winnipeg the following day. The route is expected to take in Fargo and Grand Forks, N.D.

Announcement of the date of the derby was made following the visit from Montreal on the R.S. Montross. On June 12 and will be inspected the tour to arouse interest in the air carnival.

The first air derby from St. Paul was staged last May as a good-will tour to Winnipeg.

Aviators Found Dead

Two Australians Met Fate In Search For Lost Southern Cross

Sydney, N.S.W.—Suffering agony from thirst and exhausted by desperate efforts to take off from the ragged ground where they landed, Robert Hitchcock and Lieut. Keith Anderson of the aeroplane Kookaburra died some time either on or after April 12.

The grim story of the fate of the two men who had taken part in the search for the aeroplane Southern Cross, was revealed in the notes of a diary scratched on the rudder of their plane.

First definite news of the death of the men came with the report from a land party that had made its way over the rough country to the stricken plane.

Miner's Fund Closed

London, Eng.—The Lord Mayor's fund for distressed mariners, was closed after it had reached \$423,000. To this amount the government pound-for-pound grant must be added. The total amount for relief will therefore be \$846,000.

Postpones Long Flight

Berlin.—Captain Hermann Koch, noted German trans-Atlantic flier, told the Associated Press that his projected flight to the United States with Col. James Fitzmaurice, could not be expected this year and possibly not for another two years.

Tynside Trainees

Immigrants from Great Britain arriving on board the Canadian Pacific liner "Duchess of Richmond" at Saint John on that vessel's first voyage to Canada. The men, who hail from Tynside, have all been trained in Canadian farming methods under the British Ministry of Labor, in co-operation with the Canadian Pacific Railway. They are destined for all parts of Canada.

Canoe Trip Across Canada

Two Montreal Youths Commence Journey From Vancouver

Vancouver.—Paul Parquin and Richard Lessage, two Montreal youths, started out recently on what they call a canoe trip across Canada. Their 16-foot canoe was laden with camp equipment and supplies as they pushed their way up the Fraser River to Lytton and from there up the Kootenay River to Kelowna as the first part of their trip. They expect to reach Halifax in seven months.

Plane Races Thousand Miles To Hospital

Carried Woman Critically Ill From Alaska To Seattle

Seattle, Wash.—Ending a one thousand mile race against death, the aeroplane Jaganah landed here, with Mrs. Peter Kostroutsky of Sitka, Alaska. A waiting ambulance rushed the woman, who was in a condition for emergency, to hospital. The woman was brought in the plane from her Sitka home to Seattle when physicians said she had a chance of living unless afforded expert treatment and hospital facilities such as were unavailable in Alaska.

China's Name For Hoover

Peking.—President Herbert Hoover has been given a new and more home name by the Chinese press since his assumption of the Presidency. The old name was "Hu-wa" and had a special meaning. The new name "Ji-shwa," contains the character for Buddha, and is extremely "honorable." Both names are an attempt to reproduce Mr. Hoover's name into Chinese characters.

Mon. R. B. Bennett Rescued

Vancouver a courier by Mr. Weldon Coates, wife of Hon. R. B. Bennett, leader of the Conservative party in Canada, died at home here following a long illness.

REQUIRE LARGER VESSELS FOR THE BAY ROUTE

Ottawa.—Adopting the annual report of the Canadian government merchant marine, the parliamentary committee on commerce and shipping canvassed the whole of the government's shipping activities.

A suggestion by Hon. H. H. Stevens, Conservative Vancouver Centre, that Sir Henry Thompson, president of the committee, address himself to the task of reconstructing the business of the C.M.M. with a view to eliminating the deadweight losses incurred year after year met with Sir Henry's approval.

It was giving that matter his consideration, he said, Hon. C. A. Dunning, minister of railways, asked if Mr. Stevens would support such a project if it were brought down by the government next year, and Mr. Stevens replied in the affirmative.

The commercial value of the Hudson Bay was discussed, but Sir Henry was opposed to Mr. Stevens' suggestion that the smaller boats of the company be put out of service in the beginning in order to demonstrate its feasibility. Mr. Dunning felt that in order to give the route a real "try-out" it would have to be done with vessels better equipped than the government's steamers. He was convinced, however, that when everything was ready a proper trial would be given.

When the feasibility of the route was discussed, this had been demonstrated by the department of railways and the shipyard at Hudson Bay, constantly going into Hudson Bay. Mr. Dunning, expanding on the advantage of the route, cited how one ship, not belonging to the C.G.M.A., had loaded 3,000,000 feet of lumber at Vancouver, had come via the Mackenzie Canal, and discharged its cargo at Churchill. As an analysis of the costs showed that it was cheaper to transport the lumber in that way than to bring it to the coast and then to Churchill, even if the railway had then been laid to Churchill.

When the report was ready to sign there would be means found to carry it, said Mr. Dunning. The situation was unique. Most ports had grown too large, but this one had been made.

FAVOR PRINCIPLE OF INSURANCE FOR UNEMPLOYED

Ottawa.—The principle of insurance against unemployment, sickness and invalidity is accepted and endorsed by the special committee of Parliament on industrial and international relations in a report presented by its chairman, Cameron R. McDonald, Liberal, North Battleford, in the House of Commons. The committee should not be based on compulsory contributions derived from the insured, employer and employee, the report states.

The report continues: "The committee recognizes that while it is highly desirable that such legislation should be uniform in all the provinces, and while social insurance is a Federal subject, nevertheless, according to the department of justice, under our present legislative jurisdiction in relation to the establishment of a compulsory system of unemployment insurance is vested exclusively in the provincial legislatures."

"Our committee finds that the provinces, on being consulted by the department of labor with respect to their attitude towards the establishment of a general scheme, do not appear to be prepared to take immediate action.

"Under these circumstances, our committee submits the following recommendations:—

"(a)—That with regard to sickness insurance, the department of pensions and national health be requested to initiate a comprehensive survey of the field of public health with special reference to a national health program. In this it is believed that it would be possible to secure the co-operation of the provincial and municipal health departments as well as the organized medical profession.

"(b)—That in the forthcoming session, provision should be made for the securing of the fullest possible data regarding the extent of unemployment and sickness; and that this should be compiled and published as early a date as possible.

"(c)—That the federal government be requested to bring the subject matter of this reference before the next federal-provincial conference; and our committee suggests that the government by the end of the session be invited to send representatives of the employer and employee bodies to discuss the subject matter of this report."

CHAMPION CHATTER

VOL. 2

Thursday, May 9, 1929

No. 12

Published in the interests of the People of Champion and Farmers of the vicinity.
GEO. L. DEPUÉ, Editor.

EDITORIAL

A man died recently in Chicago who had amassed a fortune of nearly a million dollars. For years he had gambled on the stock exchange. It was his habit to arrive at his office late, then ask his manager "what is the public doing today?" If the trend was buying he would sell; if the majority were selling he would buy. His motto and guide was "Most people usually guess wrong."

Our heart felt sympathy goes to the Path family in their sad bereavement.

Sadder But Wiser
A kindly old man was McBride.

He once gave a hiker a ride.
Now wiser and sad

Our Company have
received a new tractor,
which is a size 2230
with a price and with a
service behind it that
will please all. A sample
machine and more
about this later.

Blue is the only color
we can feel.

Our good friend E. P. Upton has returned from an extended trip to Europe and reports an excellent trip. The wise party who said that, "All it takes to make a good Canadian is to send him away for a while" knew what he was talking about.

Fish Facts
An eel has two hearts, one of which beats about 40 times a minute, the other about 110 times a minute. Carp and eels can live longer out of water than any other fish. Hermit crabs are the only ones to die when out of water.

The swiftest fish is the whale although the salmon is a fast swimmer, too. A strong salmon can cover about 25 miles an hour.

Most of our so-called "cod-liver oil" comes from a shark, but it possesses the same medicinal value.

Did it ever occur to you that the more we dwell upon our hurts the more they hurt us.

In spite of what the almanac may say, the longest day in the year is the one you spent in a day-coach.

There is a century of service back of every Mc-Dug farm machine—it goes free with the purchase.

LOCAL AND GENERAL

Champion Elks Sports and Carnival—July 1 and 2.

It's in the air. It's here. It's there. It's everywhere. Shivery Mystery—"The Last Warning."

On Thursday the Champion No. 1 oil well was down to a depth of 185 feet.

The Ladies Aid will meet at the home of Mrs. Groves on Thursday, May 30th.

Found—Firestone tire, size 48x24 and rim. Owner call at Chronicle office.

K. R. McLean R.O., of Anderson & McLean, Sight Specialists, 208 8th Ave. West, Calgary, will make his monthly visit to Champion Thursday, May 30th. At the Drug Store.

The Women's Institute meets at the home of Mrs. W. Ulrich on Tuesday, May 14th.

Mr. and Mrs. P. P. Peterson and Mr. and Mrs. E. P. Pacey attended the L. D. S. church conference held in Lethbridge.

Mr. and Mrs. W. A. McIntyre were registered at the Marquis in Lethbridge this week.

Society Brand Clothes

Society Brand

We have never used the word "cheap"

That word carries a meaning that doesn't apply to the merchandise we sell. It seems to suggest that we can give you something for nothing. And we can't.

Take Society Brand Clothes. They cost a bit more than the average. They simply can't be sold for less than forty dollars. And when you buy them you're paying for everything you get.

But here's the point: The things you do get—such as fine fabrics, really expert tailoring, and unequalled smartness of cut—are of the sort that give you more satisfaction than you can measure in money.

That's value—as we understand it. Come see our new showing of Society Brand, and we believe you'll feel the same way!

Prepare NOW to Look Your Best for the Holidays
Suits priced from \$25 to \$85
and we guarantee them to fit

JOPLINGS

IT'S THE CUT OF YOUR CLOTHES THAT COUNTS

Miss Mary Bowman was a Calgary visitor last week.

Any considerable motorist will give a woman half of the road, if he knows which half she wants.

Anyone desiring scavenging done will find Harry Smith located east of the municipal office.

Mrs. C. Atkins is staying with her mother, Mrs. F. Popham at Barons, who has been ill for the past two weeks.

Mrs. J. McIntyre was a bridge hostess two evenings in succession recently in honor of her sister, Miss Perry of Strathmore.

Lost—On road leading north west of Champion, license plate No. 61 801. Finder leave at Chronicle office or return to Otto Hagg.

Just arrived at Campbell, another big shipment of Early Ohio seed suds.

The Anderson Bros. who farm east of town will perform for its and carry passengers in their aeroplane from Calgary at Vulcan on Victoria Day, May 24th.

The church on Sunday evening was packed. Rev. Hunt delivered an interesting sermon, and the choir rendered excellent music. Several musical selections were also given.

Use mulch paper for your garden. You not only increase your yield 3 times but you save hoeing and weeding, as well as retain all your moisture. We will have mulch paper in stock.—W. C. Hoskins.

Members of the local Women's Institute will be entertained at Carmangay on Friday night, where a special program for "Mothers' Day" has been arranged. Kirkcaldy and Barons Institutes will also take part.

With others the Pioneers Club failed to receive a wreath in time for J. W. Fath's funeral and the family are in receipt of a letter from H. Cooper, secretary, expressing regret for the forced omission, and sympathizing with the family in their bereavement.

A party from Claresholm tried to find the oil well at Vulcan the other day and on returning via Champion expressed themselves quite freely with regard to misinformation with regard to its location which has been indulged in so freely lately. Doubtless, after the Vulcan school children are taken out to view a first class deep well drilling outfit in the Champion district its location will be realized at that point.

Buy seeds in bulk at Campbell. Lawn grass, beans, peas, radish, rape, corn and etc.

The Management Of Poultry

Of the three phases of Poultry Raising—Feeding, Breeding and Management, there is no doubt that Feeding is commercially most important and to be really profitable one must have a well bred-to-Lay flock, take good care of them, feed good feed and keep the Poultry House sanitary. Low

average egg production is undoubtedly due to feeding hens entirely on whole grain. Hens fed on grain and given all they want and allowed free range, average fifty eggs per year. Biologically tested Mash has produced 50 eggs at a small additional cost above grain fed hens. The objects of feeding are to maintain the body in good health, to promote the most rapid and efficient growth to obtain maximum egg production. A hen requires from 75 to 90 pounds of feed per year; 60 to 80 per cent goes to body maintenance. A hen is expected to produce several times her weight in eggs in the course of a year and one that lays 200 two one eggs produces approximately 44 ounces of egg shells, that is one of the reasons why minerals play such an important part in poultry feeding. If the feed is not sufficient in mineral protein or carbohydrates the bird's system is unquestionably severely strained. The ration for a laying hen must include the necessary ingredients in the right amount to nourish all parts of the body and make eggs. She may lay 50 eggs sometime at the expense of body tissues but ultimately the result is lower egg production and higher mortality. The materials that compose feeds are chemically classified as Carbohydrates, Fat Protein, Ash and Water. The Carbohydrates and Fat consist essentially of carbon and water, that function is to supply heat, energy and fat for the body tissues also yolk for the egg. The Proteins form the flesh, feathers, tendons, blood and the white of the egg. Proteins in the feed should be as nearly like the proteins forming the chicken and the egg as possible. Ash or Minerals play an exceedingly important part in the Poultry Nutrition. A Laying Hen needs a large quantity of minerals and to feed a ration deficient in minerals will tend to have weak bones and tissues, lack this and is subject to disease. Large amounts of Calcium are required for bones, egg shells and tissues also quantities of phosphorus Sodium and Chlorine are required for blood, bones and tissues. If a hen is not given a sufficient quantity of minerals she will either stop laying or decrease the size of the egg or produce weak shelled eggs. Feeding which consists of the birds consuming large quantities of mash gives them large quantities of minerals and are able to maintain body weight under the strain of heavy egg production. The Cod Liver Meal and Oil in the mash not only supplies quantities of minerals but ensures full mineral nutrition to the other feeds in the mash also conditions the blood stream and the texture of the shell and health of the hen in winter and summer also during the moulting season.
